

## The Alma Record.

Published Thursday Afternoon By  
C. F. Brown, Editor and Prop.  
SUBSCRIPTION, \$1.00 PER YEAR

The Record is entered at the postoffice at Alma, Michigan, for transmission through the mail as second class matter.

Mr. Editor—Permit me to assure you and the city Dads of Alma, of our appreciation of your efforts to regulate traffic on your main streets, and in this I think I voice the sentiments of the large body of farmers who trade with your merchants and have other business in your progressive city. I am aware that some farmers resent intrusion upon their custom of driving hither and thither upon the busy streets and I must confess that at first I was myself inclined to "halk" when politely requested to "keep to the right" but as I become accustomed to the rules and know the reason for them I can see that the benefit is almost entirely on my side. The autos seem to take care of themselves alright and when anything happens, I notice it is usually a wheel off a wagon or buggy rather than a fender off a machine. Who's to blame? Usually hard to tell, but we always know who has to stand the damage.

But the great benefit to be derived is the ease with which we can get around in a busy street. We know just where every team and auto ought to go and if they always keep their proper place there will be little confusion and no injuries.

Now those barrels. That is a tip-top notion. I hope you make them permanent. At first I thought them crazy, but they're all OK. They keep the traffic in proper place and while it takes a little longer time to make the turn, it spells "safety first" and no mistake.

Just a question Mr. Editor, and a suggestion and then I'm done. What about pedestrians? What right have they on your streets? Perhaps you can give us a little information.

Now I want to make a suggestion to you and another to my fellow farmers. To you: Enforce the rules. See that the autos drive slow. That may not always mean strictly within the law under penalty of fine or worse but reasonable. I believe the rule is that autos should not move faster than is reasonable and prudent, having regard to conditions obtaining at the time. So that ten miles an hour might be unlawful on a busy street, might easily be altogether too fast. Your auto owners should adopt the rule "safety first", and if they find it hard to learn take a lesson or two from the City Judge.

Fellow farmers: Get into the game. The rules are as much for our benefit as anyone, and let's keep what we can. Keep headed right, in the line of traffic. Hitch on a side street if we are to be in town for any length of time. And if we'll all pull together. We will enjoy traveling in Alma's streets where we know that the slogan is "safety first".

### Agriculturalist.

[Regarding pedestrians: While it is the law that we each do what we reasonably can to avoid accidents, pedestrians have the right of way at crossings where it is intended that pedestrians should cross. Drivers should remember this—Editor]

### POSTAL SAVINGS NEWS

Every person in the United States ten years old or over may open an account in a postal savings bank after July 1st, according to an instructive leaflet on the Postal Savings System just issued by Postmaster General Burleson. This important extension of the service will be made possible by permitting persons living in communities so sparsely settled as not to justify the designation of their local post-offices as regular postal savings banks to open accounts by mail.

Governor Dockery, Third Assistant Postmaster General, who has direct supervision of postal savings, was so impressed by appeals from all over the country to open postal savings accounts by mail that he took up the task some weeks ago of working out a feasible and safe method for meeting a demand well illustrated in a letter from a Saline County Missourian, who resides many miles from a postal savings bank.

"Having a few hundred dollars saved from fifty years of hard and arduous labor and skimping economy on the part of my wife and myself, we concluded to deposit it in the postal Savings Bank of ——. We wrote to the postmaster at that place and received reply to the effect that none but patrons of that office could deposit in that office which is very disappointing news to us. Our little farm is not large enough to support us and land is so high that it is impossible for us to buy more with what little we have saved and we are so old that we can't labor much now and we would be so glad to lay by at least enough to put us away in decency."

Under the plan adopted by the postmaster general for opening accounts by mail an intending depositor residing where there is no regularly designated postal savings bank, will apply to his local postmaster who will see that necessary identification data is prepared and forwarded to a nearby postoffice authorized to accept deposits. The intending depositor will then be given permission to forward his first and subsequent deposits by money order or registered mail direct to the postmaster at the banking point for which receipts or certificates will be issued. He may withdraw any or all of his postal savings by mail and on demand together with any interest

that may be due him.

The new leaflet points out that any person ten years old or over may open an account in his or her own name; that an account may be opened by a married woman free from any control or interference by her husband; that post office officials are forbidden to expose to any person except the depositor the amount of any deposits; that withdrawals made be made without any previous notice; and that the government guarantees to repay all deposits on demand with accrued interest.

The leaflet will soon be printed in 22 foreign languages for distribution through local postoffices. The foreign-born citizen has taken very kindly to postal savings, and literature in his own language will be of great assistance to him. In a recent article, Postmaster General Burleson, commented on the foreign-born depositor as follows:

"Upwards of 500,000 depositors now have accounts in the Postal Savings System and they represent every nationality on the earth. They also represent almost every known occupation—professional men, theatrical people, mechanics, laborers, fishermen, pack peddlers, etc. But the majority of them are wage-earners, and of this class the foreign born largely predominate. A census of depositors taken by the Post Office Department shows that approximately 40 per cent (200,000) of the depositors are foreign born citizens and they own more than fifty per cent of the deposits—splendid evidence of the confidence of our newly acquired citizens in the ability and good faith of their adopted country to fulfill its obligations."

There is another reason which led immigrants, unfamiliar with our language and business methods, to turn to the government to safeguard their humble savings and that reason is the disastrous experiences many of them have had by the failures of bogus "private banks" offered by swindlers of their own tongue who have preyed mercilessly upon their loneliness and credulity."

Postal savings receipts have broken all records the past year. During the eight months prior to April 1st there was a net gain in deposits of \$19,000,000, as against a gain of \$8,000,000 for the same months the year before. Thousands of new accounts have been opened and the millions made up largely of hidden savings have been turned back into the channels of trade just at a time when there was pressing demand for every dollar.

### THIRTIETH CONVENTION

#### GRATIOT COUNTY W.C.T.U. AT POMPEII

Under efficient leadership of Mrs. Myrta Youngs, President, a very helpful and inspiring program consisting of reports, addresses, etc. was carried out, May 12-14 at Pompeii. This convention was reported, by the four Alma ladies who attended, Mrs. C. L. Wood, Mrs. E. C. Crandell, Mrs. S. A. Wilson and Mrs. James Miller, at the home of Mrs. Crandell last Wednesday afternoon.

Report was as follows: The convention was presided over by Mrs. Myrta Youngs, who has been our president for three years. Among the speakers were Mrs. Norma Mudge of St. Louis, president of the eighth district, and our much loved and admired state president, Mrs. E. L. Calkins of Battle Creek. We were welcomed in behalf of the town by Mrs. Foster, for the churches by Rev. Biery and for the local union by Mrs. Mary Seamon. All of the speakers expressed themselves in a very happy manner and gave us a sincere and most royal welcome.

On Thursday morning was the appointment of the committee, and miscellaneous business. In the afternoon, Mrs. Mudge read a very fine paper, the main thought of which was, "Just as long as there are boys and girls, just so long must we be working. The time has gone by when the enemy can swear and say no one but a few women are trying to do anything. Some of the brightest and best men are in the fight to a finish. This is the slogan, Forward to do the best you can. Today is yours, Tomorrow may belong to the past."

"Echoes from the national convention" was a fine talk given by Mrs. Myrta Youngs, who was a delegate to that great convention held last fall at Atlantic, Georgia. 1200 voting delegates, the brightest and brainiest women in the world. The national W. C. T. U. has 289,761 members.

The grand organ costing fifteen thousand dollars, the vibration of which fairly made the walls of the great tabernacle tremble, poured forth strains that were an inspiration and uplift to every lover of music.

The Columbia choruses composed of young people of Atlanta who had been under the training of Mrs. Suesna Blaine, of Washington, D. C., did excellent work, both in demonstrations and songs. One in particular, in which a young man pictured the cunning and trickery of the liquor traffic, ten children responding with appropriate gestures at the end of each stanza, "And old alcohol'll get you if you don't watch out."

"The song to the Flags" aroused all the patriotism within us and we were led to think of Miss Willard's words, "Oh, Holy Flag, and exclaim, 'long may it wave o'er the land of the free.'"

Another splendid thing was the chorus of one hundred students of the Morris Brown university (colored), who occupied the choir loft one evening and favored the convention with several selections in their characteristic

tic way and melodious voices.

The rally cries and yells of the different states demonstrated in no uncertain sounds the attitude of our organization towards the questions of temperance and suffrage. Ohio, not discouraged nor lulled into inactivity by her recent defeat, knows where to lay the blame and is taking up the fight with renewed vigor, saying "there's a reason."

"We can't vote,  
Neither can maw,  
Ohio went wet—  
Blame it on paw."

Something worth while demonstrated what a millionaire can do with some of his money when a wealthy man who was introduced to the convention, said many splendid things of the Woman's Christian Temperance Union and presented Miss Gordon with an automobile.

Mrs. Ella Wood the president of Alma union, gave her interesting talk on Temperance and Missions. Mrs. Calkins who is always a live wire, said in part, You will take courage when I tell you that both Senator Smith and Senator Townsend voted for the Hobson bill in the House, that there are fifteen Michigan men in Washington and that 13 of them voted for prohibition. With such indisputable facts before us, who will dare say that the day of small things in the anti-alcoholic war is not passed in Michigan.

At Lansing we are looking for great victories before spring. It is as yet too early to give any definite outline of plans. We have a lieutenant-governor whose attitude on the temperance question is well known throughout the state. The senate has for the first time in the history of our state a dry liquor committee, with that staunch temperance man named Straight, who lives on Church street in the city of Coldwater, as chairman.

### "PAT'S" PUPILS WILL MEET AT HOME OF ALLEN REED, JUNE 5.

"Pat's" pupils will hold their twenty-seventh annual meeting in St. Louis at the residence of Allen Reed, on Saturday, June 5. This is to be the first meeting held in St. Louis since 1905.

Mr. Pattengill was superintendent of our schools for two years, coming here in September, 1874, fresh from the state university. In 1876 he was elected to the Ithaca schools where he remained eight years. A few years later his old pupils held a reunion which proved so enjoyable that they have continued to meet annually, two meetings having been held in this city, the first at the home of the late O. M. Everdon, in 1899, the second at the home of Mrs. Lola E. Lovell. Any person who was a pupil in the St. Louis schools during the superintendency of Mr. Pattengill is most cordially invited to attend the forthcoming meeting. Probably it will be several years before another meeting will be held here. "Pat" will be glad to see a large attendance of his old pupils and their families.

An interesting feature of these meetings is the reading of letters from old schoolmates who have wandered far from the old camp-ground. The singing of old songs, the telling of old school days and mishaps and the one o'clock eat, all go to make a pleasant day.—St. Louis Leader

### LIBRARY AND HISTORICAL MEETINGS

The forty-first annual meeting of the Michigan Pioneer and Historical Society will be held in the Senate Chamber, Lansing, on Tuesday and Wednesday, June 2 and 3. Besides a number of interesting papers by Hon. Charles A. Weissart, Clarence M. Burton, Andrew J. Dougherty, Mrs. Lillian Drake Avery and others, there will be a conference on "Methods of Co-operation on the part of public libraries, patriotic societies, and local historical societies, with the Michigan Historical Commission in gathering and publishing materials relating to the history of the state. Among the speakers will be William L. Jenks, president of the Michigan Historical Commission, Hon. Edward O. Wood, member of the Commission, also of the Mackinac Park Commission and the Genesee Historical Society; Mrs. M. C. Spencer, State Librarian; Mrs. Hubbard, Grand Rapids Historical Society; Mrs. Henry E. Hoyt, Kalamazoo Historical Society; Hon. Ernest G. Pray, Eaton County Historical Society; J. S. Cleavinger, Librarian Jackson Public Library; J. W. Sexton, Principal Lansing High School; Mrs. R. H. Ashbaugh, President of the Michigan Federation of Women's Clubs; Mrs. William H. Wait, Michigan State Regent, D.A.R.; Mrs. James H. Campbell, President Michigan Society of the Daughters of 1812. Clarence E. Bement, President Michigan Pioneer and Historical Society, will preside at the meeting; and William Lavin of Detroit, tenor, will sing several solos.

### SOME FORMS OF RHEUMATISM CURABLE

Rheumatism is a disease characterized by pains in the joints and in the muscles. The most common forms are: Acute and Chronic Rheumatism, Rheumatic Headaches, Sciatic Rheumatism and Lumbago. All of these types can be helped absolutely by applying some good liniment that penetrates. An application of Sloan's Liniment is good for pain, and especially Rheumatic pain, because it penetrates to the seat of the trouble, soothes the afflicted part and draws the pain. "Sloan's Liniment is all medicine." Get a 25c. bottle now. Keep it handy in case of emergency.

### SECOND BOOSTER DAY

Merchants pronounce the second Booster Day as decidedly good. We can say for ourselves that it was a fine success, for thirty one new subscribers were added to our list. Bad weather prevailed but a large crowd thronged the streets and stores to take advantage of the splendid bargains which the merchants were offering.

### RECORD EXCURSION TO DULUTH

Arrangements have been completed for an excursion from Alma to Duluth and return, under the auspices of the Record via "Ann Arbor" and Grand Trunk Railroads and the Northern Navigation Company's magnificent steamship Noronic, for the benefit of the citizens of Alma and vicinity.

The date secured for the Record excursion is Saturday, July, 24th and it is considered the best of all the sailing dates of the year, for this delightful, six-day, fresh water voyage to the North Country. The Soo, with its great locks, second only to the locks at the Panama Canal, Port Arthur, Kakabeka Falls, Fort William, Old Mission and Duluth.

By special arrangement with the Northern Navigation Company, of Sarnia, Ontario, the Record is enabled to offer this wonderful Great Lakes cruise to the people of Alma and vicinity at a saving of practically \$19.00 under regular rates.

Think of it! A weeks outing on the largest and most magnificent passenger steamship on the Northern Lakes, rail transportation from Alma to Sarnia and return, meals and berth on steamer, side trips, auto ride around Duluth, etc., for less than it would cost to stop at a high class hotel for the same length of time.

The large luxurious steamship Noronic has been secured for this trip with all the material comforts and pleasant enjoyments of ocean travel. Added attractions of a side trip to Port Arthur, via Canadian Northern Railway to Kakabeka Falls, 25 miles inland, higher than Niagara and just as nature formed them centuries ago, a picnic lunch at the Falls, a six o'clock dinner at the monster Prince Arthur hotel at Port Arthur, an automobile trip about the fine boulevards and mountain drives of Duluth, and, five o'clock tea (ocean style) each afternoon, with concert cabaret and dancing followed by refreshments of ice cream, cake and fruit punch each evening on shipboard. The famous Noronic orchestra discourses music during noon luncheon and dinner daily, furnishing music for the dancers in the social hall in the evening.

The Record excursion from Alma to Duluth and return, leaving Saturday, July 24th, is the vacation of your dreams. Plan your vacation accordingly and make arrangements to go. See America first, 1800 miles of water travel over the bluest water in the world, with an ever changing panorama of delightful scenery, glorious days and cool charming nights that bring peaceful sleep and perfect rest. It is a vacation you will remember as long as you live.

Full particulars and detailed information, price, etc., will be announced soon in these columns.

### CHURCH NOTES

#### FIRST PRESBYTERIAN CHURCH

William H. Mason, Pastor.  
Sunday—  
Morning Worship—10:00 a.m.  
Sabbath School—11:30 a.m.  
Mr. Frank McConkey, Superintendent.

East End Sabbath School—2:45 p.m.  
Prof. F. N. Notestein, Superintendent.  
Y.P.S.C.E.—6:30 p.m.  
Evening Worship—7:30 p.m.

Tuesday—  
East End Prayer Meeting—7:30 p.m.  
Thursday—  
Church Prayer Meeting—7:30 p.m.  
A cordial welcome to all services.

#### BAPTIST CHURCH

J. W. Priest, Pastor, Residence 802 Gratiot Ave.  
Sunday Service—10:00 a.m., Sermon: "Spiritual Freedom."  
Sunday School—11:30 a.m.  
B.Y.P.U. Meeting—6:30 p.m., topic: "The Inspiration of Missions"

Evening Service—7:30 p.m. sermon by the pastor.  
Thursday Night Prayer Meeting—7:30.

All are cordially invited to these services.

#### VARIOUS SUEZ CANALS

The Suez Canal is not the first canal to join the Red sea and the Mediterranean, according to a bulletin issued by the National Geographic Society. The Egyptians, it is stated, in 1350-1250 B. C. constructed such a canal. In the course of time it was choked with sand. Another canal was begun by Necho about 600 B. C. and completed a century later. Trajan visited Egypt, he planned to reopen the old canal, but was forced to abandon the project. It remained for De Lesseps to repeat the engineering triumph of the ancient Egyptians on a vaster scale.

#### WHOLE FAMILY DEPENDENT

Mr. E. Williams, Hamilton, Ohio, writes: "Our whole family depend on Pine-Tar-Honey." Maybe some one in your family has a severe cold—perhaps it is the baby. The original Dr. Bell's Pine-Tar-Honey is an ever ready household remedy—it gives immediate relief. Pine-Tar-Honey penetrates the linings of the Throat and Lungs, destroys the Germs, and allows nature to act. At your Druggist, 25c.

### POULTRY POINTERS.

Clean and whitewash your poultry house.

Dust the sitting hen with insect powder before giving her the eggs.

Buy a few sittings of eggs for hatching or some baby chicks if you wish to improve your stock.

Decide to increase egg production next season. Give this problem all the time you can spare for it.

Make early layers with a good, vigorous male, allowing him from ten to fifteen pullets. Breed from young males rather than from two-year or three-year males.

### LIVE STOCK ON THE FARM.

How a Grain Grower Turned a Loss Into Substantial Profit.

A number of years ago a corn and wheat farmer, whose exclusive grain growing had put him deep in debt, desired from his bank a loan of \$1,000, which J. C. McDowell in the Kansas Farmer. Except the losses there was no live stock—not a cow, a pig or even a chicken on the place. The banker, a very shrewd business man, was able to analyze the problem and to discover the cause of the farmer's financial difficulties, and he agreed to make the loan only on condition that the borrower change his system of farming.

The system outlined by the banker required that a portion of the loan should be used to purchase two cows, half a dozen pigs and a small flock of poultry. It also provided for a fair sized vegetable garden. Grain farming was to be continued as before. The banker figured that the live stock and the garden would, in poor as well as in good seasons, fully support the farmer's table. He figured that in poor years the farmer would be able to play even and that in the good, and even in the average year, the farm would produce enough to gradually wipe out the debt.

The farmer reluctantly agreed to the banker's terms, received the loan and met the conditions. In five years he was out of debt and rated as a substantial and prosperous farmer and business man. To him farming had ceased to be a game of chance and had become a business.

### TO IMPROVE THE FRUIT.

Thinning Advised For Those Who Want Product of High Quality.

To many it is a waste of time and labor to thin fruit trees, but with few exceptions it should be done. When the tree bears a light crop little thinning is necessary, but since most trees bear too much it is necessary to thin them to obtain fruit of proper quantity and quality. The purpose of thinning is to secure large, healthy, well flavored fruit in culing out the knotty, diseased, ill flavored ones. In order to prevent waste, feed the culls to hogs and poultry.

Culling out can be gauged by no fast rule. It is seldom overdone since the fruit grows fast up to harvest time. It is best to pull each wormy and blighted fruit. Such fruit will either drop from the tree before picking or prove worthless for storage or marketing.

Thinning will also prevent good fruit from contamination. In addition, the remaining fruit has a greater chance of development because the tree is not called upon to nourish those infested. The fruit produced from trees that have been thinned is of far superior quality.—American Agriculturist.

### NOTICE, HORSEMAN

The Record has a quantity of Stud Books on hand. If you want one call and see us.

### DOG GIVES LIFE FOR SAILOR.

Leaps From Ship in Storm and Dies Saving His Friend.

How a Newfoundland dog gave his life in saving his friend, the cook of the schooner J. Frank Seavey, was told when the vessel reached Philadelphia.

The J. Frank Seavey sailed from Bridgewater and recently ran into a heavy gale off the Bay of Fundy. George Thompson, the cook, was washed overboard. The dog summoned help by barking and leaped into the boiling sea. Thompson caught the dog around the neck and supported himself until a boat was launched.

When the boat reached Thompson the dog was exhausted and sank.

### GERMANY NOW SWATS FLIES.

Price Put on Heads of Crows That Are Ravishing Wheat Fields.

War upon flies, gnats and mosquitoes is being ordered in the German provinces adjoining Switzerland to prevent the possible spread of disease. Dispatches from Geneva say. Notices setting forth the sanitary regulations of the government have been sent to every home.

The grand duchy of Baden has been plagued with crows, which have eaten the spring wheat. The government has offered the equivalent of 1 cent for the head of every crow killed.

### EGGS UNLAI D GIVE CHICKS.

Success Attends Odd Experiment of Pittsburgh Chemist.

Mylo Culler, a druggist at Pittsburgh, has in his window three young chickens hatched from eggs that were never laid.

Culler killed three laying hens and took from each an egg on which the shell had not been formed. He covered them with plaster and placed them in an incubator.

In due time the chicks made their debut. They were doing nicely at the last reports.

### CATARRH GERMS EASILY KILLED

By Breathing Into Throat Nose and Lungs a Pure Antiseptic Air

If you have catarrh and want to get rid of it you must kill the germs which cause the disease.

The best known way of destroying catarrh germs is to breathe into the air passages of your nose and throat and lungs, the pleasant, penetrating air of Hyomei (pronounced High-o-mey). Hyomei is made from purest oil of Eucalyptus combined with other powerful, healing, antiseptic and germicidal ingredients. You breathe it through a little pocket inhaler which Chas. Rhodes and other leading druggists in Alma and vicinity are furnishing with every complete treatment.

Every time you inhale the sweet fragrant air of Hyomei through this little device you are drawing into your swollen, inflamed, germ laden membranes, a medicated air which will not only reduce all the swelling and inflammation and open your clogged nose and stopped-up air passages, but will absolutely and positively destroy every trace of catarrh germ life it reaches. Druggists are so sure of the blessed, lasting relief that Hyomei brings to catarrh sufferers that they sell it invariably on the positive guarantee that money paid will be refunded if successful results are not obtained from its use.

Cleaning Oil Paintings.  
Oil paintings can be best cleaned at home by rubbing a half of a raw potato quickly over the surface and then polishing with a silk handkerchief.

### FARM WISDOM.

There is no reason why the farm home should not be just as attractive as the city home. In arranging farmhouse plans those that are adapted to the city can easily be changed to suit farm needs. Make your wife's workshop as attractive and convenient as any to be found anywhere.

The inside of a modern dairy barn looks very different today from the inside of a dairy barn twenty years ago. We are beginning to realize that sunshine is a necessary part of dairy sanitation. In fact, it is the principal factor.

The time is rapidly approaching when dairy products, the same as all other commodities used for food, will be paid for according to quality.

The septic tank deserves a place on every farm. It is one means of bringing city conditions to the farm home.

### RUNNING AN INCUBATOR.

Cooling and Turning the Eggs Should Be Regularly Performed.

Cooling and turning the eggs in the incubator is a part of the work that must be attended to promptly, regularly, writes W. C. Thompson in the Country Gentleman. The mother hen turns her eggs in the nest each day and leaves them to cool at about the same time each day if she has her way about it. After the third day of the hatch the eggs should be turned regularly each morning and evening. This may be done by removing a few and gently rolling the others about in the tray. The idea is to change the position of the developing germ within the shell and keep it free from the shell. Changing the position of the eggs on the tray is also of advantage, as there may be a slight variation of temperature in different parts of the egg chamber.

The eggs should be cooled once a day. Start on the third day, when the eggs are first turned. It is necessary to cool them only the length of time that it takes to turn them. From the third day to the nineteenth day they should be cooled regularly. As the chicks develop they may be cooled longer each day until during the latter part of the hatch they may be cooled for almost an hour without any injury and with great benefit.

On the nineteenth day the chamber should be closed, to remain closed until the chicks are hatched. On the twentieth, seventeenth and nineteenth days the eggs should be sprayed with warm water to furnish sufficient moisture to aid the chicks in picking their way through the shell. If a sand tray is in the machine this spraying is unnecessary. The flame should be turned down slightly during these last two days, as an increased temperature results from the animal heat in the chicks' bodies. The chamber should be darkened if there is a glass front in the machine. This will tend to prevent the chicks from forcing their way toward the front of the machine. They are supposed to sleep for twelve hours after coming from the shell. If the chamber is light they will not do this.

### HATCHING EGGS—BABY CHICKS

—Order now. Lately purchased some R. C. Rhode Island Red cockerels from a good strain. Pullets selected 75 per cent fertility guaranteed. Eggs 50c per 15—65c postpaid; \$3.00 per 100 at house.

Baby chickens 10c each. Mrs. William Mills, Big Four farm, Rosebush, R. F. D. 3, Bell phone 65—Weidman.

adv. 1884 4w.p.d.
